# Winter Service Plan

*For East Ayrshire and South Ayrshire Councils*

**2020/21**

**East Ayrshire Council**  
Comhairle Siorrachd Àir an Ear

*south*  
**AYRSHIRE**  
COUNCIL

## INTRODUCTION

The Ayrshire Roads Alliance within the Department of Safer Communities is responsible for providing the winter service for East Ayrshire and South Ayrshire Councils. The remit includes:

- Establishing standards
- Establishing treatment priorities
- Day to day direction of operations
- Monitoring performance
- Liaison with adjoining Councils and Emergency Services

The Winter Service Plan was revised during the summer of 2015 to introduce the concepts and to follow the format provided in the code of practice 'Well Maintained Highways', which was updated in September 2013.

In addition, the Ayrshire Roads Alliance will follow advice from the SCOTS Winter Service Subgroup on the use and application of Appendix H: Winter Service issues.

There is additional and more detailed information available (within the Ayrshire Roads Alliance Quality Management System and the Severe Weather Operations Plan for resources involved with the management and implementation of this Winter Service Plan.)

## 1.0 Statement of Policies and Responsibilities

### 1.1 Statutory Obligations and Policy

- 1.1.1 East Ayrshire and South Ayrshire Council have a statutory obligation under Section 34 of the Roads (Scotland) Act 1984 to prevent snow and ice endangering the safe passage of pedestrian and vehicles over public roads in terms of the above legislation a 'road' includes carriageways, footways, and footpaths areas.
- 1.1.2 South and East Ayrshire Council's aim is to provide an effective and efficient Winter Service in accordance with 'Well Maintained Highways' and within the resources available to: -
- Allow the safe passage of vehicles and pedestrians
  - Minimise delays due to winter weather
  - Ensure operations are undertaken safely
- 1.1.3 The aim of the Winter Service Plan is to set out how the Winter Service will be provided within each Council roads network.

### 1.2 Responsibilities

- 1.2.1 The enabling and service delivery of the Winter Service is the responsibility of the Head of Service - Ayrshire Roads Alliance.
- 1.2.2 The Ayrshire Roads Alliance is responsible for the work involved in providing the Winter Service. These responsibilities include the following:
- Developing the Winter Service to cope with an 'average winter' but having the capability to be extended or adapted when winters are more severe or of a longer duration than average.
  - Production and distribution of the Winter Service Plan.
  - Review and update of the Severe Weather Operations Plan
  - Providing accurate and timely information to the East Ayrshire Risk Management Centre and South Ayrshire Monitoring Station.
  - Carrying out an annual review of the service and updating the Winter Service Plan where necessary.
  - Liaising with adjacent roads authorities in the preparation of the Winter Service Plan to ensure continuity of service across boundaries.
  - Providing a list of roads designated for priority treatment.
  - Providing a list of footways and pedestrian areas designated for priority treatment.
  - Providing a list of roads designated as strategic routes for snow clearing.
  - Providing decision-making charts, advice, and guidance for those involved in the Winter Service.
  - Liaising with the Winter Supervisors to provide help and advice to ensure the service is delivered in the most effective, efficient, and economical way, including establishing operational priorities during extreme weather conditions.
  - Arranging for weather forecasts, ice prediction reports and road and weather monitoring information to be available throughout the winter period.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 5 of 122               | Date     | 01/10/2020 |

- Arranging for appropriate specialist vehicles and equipment to be available throughout the winter period.
- Arranging for supplies of salt to be available at the start of the overall winter period.
- Monitoring the salt usage and ensuring supplies are replenished to maintain an appropriate level of salt in the stockpile.
- Establish contact numbers for access to emergency services control rooms, public transport operators, local media, and the motoring organisations.
- Passing of factual information on road conditions to each Council's Communications Team as and when required.
- Monitoring all aspects of the Winter Service and providing information on performance indicators.
- Maintaining full and comprehensive records of all Winter Service activities.
- Directing all available resources.
- Liaising when necessary with the Road Weather Forecast Provider.
- Monitoring the weather forecasts and actual weather conditions.
- Monitoring actual road surface temperatures and road conditions.
- Assessing the requirement to carry out precautionary or post salting treatment or snow clearance on the network, deciding appropriate start times and rates of spread and arranging for the work to be carried out, monitoring effectiveness of treatments and amending instructions, when necessary, due to a change in conditions
- Assessing the need to carry out post salting or snow clearance of the remaining road network during prolonged spells of sub-zero temperatures, and ensuring the works are carried out when necessary and as resources permit.
- In the event of deteriorating conditions, notably major blockages to the primary route network and/or severe drifting snow to contact:
  - a) The Emergency Services Control Rooms. (Police, Ambulance, Fire)
  - b) Ayrshire Civil Contingency Team
  - c) Communications Team.
  - d) Chief Executive and/or other nominated Senior Officers.
- Maintaining a list of contractors with suitable plant and operatives for snow clearing purposes and hiring in such when necessary to do so.
- Liaising on operational matters when appropriate with the adjacent Local Authorities to ensure continuity of treatment across authority boundaries.
- Liaising when appropriate with the
- Emergency Services and Public Transport Operators.
- Providing accurate and timely information to the Risk Management Centre and South Ayrshire Monitoring Station.
- Ensuring the Transport workshops are notified of any vehicle faults and that they are repaired without delay.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 6 of 122               | Date     | 01/10/2020 |

- Arranging with Transport workshops for appropriate staff to be available on 24 hour call out to deal with any serious mechanical breakdown(s).
- Checking and calibrating salt spreading equipment and weighbridges and retaining of the certificates.
- Ensuring all operatives receive adequate and appropriate training in Winter Service activities and those drivers are issued with 'route cards' to record details of the treatment times, etc.

## 1.3 Decision Making Process

- 1.3.1 The day to day routine operational decisions will be made by the Winter Controller using weather forecasts provided by Weather Services Provider and the road and weather monitoring data.
- 1.3.2 The Overall Winter Period shall be from 1st October until 15th May, with the Core Winter Period being from the fourth Monday of each October ending on the second Monday of April (these periods can be extended should conditions warrant).
- 1.3.3 On receipt of a weather forecast or update, the Winter Controller will reach a decision on action for the next 24 hours from one of the five following options:
- a) Pre-salting to commence immediately after the period of mobilisation.
  - b) Pre-salting to commence at a specified time (e.g. 1900 hours).
  - c) Treatment is likely - but start time cannot yet be determined.
  - d) Treatment is possible - conditions being monitored by patrol vehicles (marginal night).
  - e) No action planned (minimum forecast temperature + 1°C).
- 1.3.4 Only if treatment is planned the decision record will include the required salt spread rate. Any post salting or snow clearance subsequently required shall also be recorded. This decision and any updates will be distributed to appropriate roads personnel and stakeholders.
- 1.3.5 The Winter Decision Matrix is contained in the Severe Weather Operations Plan.
- 1.3.6 Post salting would be carried out under the following circumstances.
- a) On Priority 1 Routes where salt has been washed off due to rain.
  - b) Remaining roads may be treated by salting as determined by priority, progress, conditions, and resources.
- 1.3.7 Snow clearing operations will be undertaken across the network as conditions dictate.
- 1.3.8 When snow is forecast, the Priority 1 routes will be treated in accordance with the Treatment Matrix.
- 1.3.9 Two stages of snow clearing can be considered
- a) Light falls of undisturbed accumulation of snow reaching a depth of less than 10mm in depth. Normally be dealt with by one or more repeated applications of salt.
  - b) Moderate/Heavy falls of snow greater than 10mm in depth that may also be associated with drifting. These conditions may require the use of ploughs, specialised equipment and/or mechanical excavators in addition to salting. As ploughing may block junctions and side roads, arrangements will be made to remove any resulting accumulations of snow, as resources permit.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 7 of 122               | Date     | 01/10/2020 |

1.3.10 Normal priority (when resources permit) will be to clear the snow from Minimum Winter Network Routes (Snow Routes) then clear the remaining Priority 1 Routes before dealing with the Priority 2 and Priority 3 routes.

1.3.11 Under extreme conditions the priority will be to clear and treat the Minimum Winter Network Routes (Snow Routes).

## 1.4 Arrangements with Adjacent Authorities

1.4.1 Reciprocal arrangements will be made with adjacent authorities to ensure the most efficient and consistent treatment of routes at boundaries, and co-operation in providing during winter service operations.

1.4.2 At the boundary of the Trunk Roads Network, Ayrshire Roads Alliance shall treat to the give way/ stop markings. The Trunk Road Operating Company shall treat the main trunk road carriageways, slip roads including lanes and splays at acceleration and deceleration lanes and splays.

## 1.5 Resilience Levels

1.5.1 Resilience Levels for salt stocks shall be as follows.

1.5.2 Resilience for the Overall Winter Period shall be a minimum of 8 days at heavy salting levels, equating to 4400 tonnes. Heavy salting is calculated as two treatments of the Priority 1 network and one treatment of priority 2 networks.

1.5.3 Resilience for December and January shall be increased to a minimum of 15 days at heavy salting levels, equating to 8,150 tonnes.

1.5.4 If stock levels fall below 4,400 tonnes, consideration will be given to introducing salt conservation methods in accordance with the Salt Resilience Plan (Severe Weather Operations Plan), this may include restricting treatment to the Minimum Winter Network Routes (Snow Routes) and the use of salt/ grit mixes.

## 1.6 Potential Resilience Measures relating to COVID19

1.6.1 Due to uncertainties concerning COVID19, Ayrshire Roads Alliance have had to prepare for potential changes in how we deliver our Winter Service for 20/21. The main area of concern is around the number of available drivers should one or more of our depots be affected.

1.6.2 Should our resources fall below the required level of drivers, the drivers 'off shift' for each week will be required to concentrate on winter duties only, ensuring the required rest is taken to avoid fatigue and adherence to the Working Time Directive, unless emergency situations occur. They will enter the depot only for gritting duties and will minimise contact with colleagues and others out with the workplace wherever possible during this time.

1.6.3 Our 20 Priority 1 routes will be treated only and were we may have a shortage of drivers, some drivers will cover 2 routes each, therefore deviating from the 3hr treatment time to a 6hr treatment time.

1.6.4 Other winter service activities shall continue as normal, with adherence to the COVID19 guidance being reinforced.

1.6.5 Where possible our Duty Supervisors will ensure the same driver/vehicle during any potential 'spike' and safe systems of work are followed with regards to cleaning of the vehicles.

## 2.0 Quality

### 2.1 Quality Management Regime

- 2.1.1 The Winter Service Plan is included in the Ayrshire Roads Alliance Quality System.
- 2.1.2 The Ayrshire Roads Alliance Quality System is externally audited and verified.

### 2.2 Document Control Procedures

- 2.2.1 All quality documents are controlled and held on a computerised document management control system and are available for viewing by all members of Ayrshire Roads Alliance staff.
- 2.2.2 The Winter Service Plan will be distributed as detailed in section 2.3.

### 2.3 Distribution of Documents

- 2.3.1 The Winter Service Plan is issued and made available as listed below

- Operational Staff
- Elected Members
- Ayrshire Civil Contingencies Team
- Neighbouring Councils
- Emergency Services and Community Planning Partners
- Ayrshire Shared Services Joint Committee
- Other Council Departments and Services
- Community Councils
- Equality Forum Group

### 2.4 Information Recording and Analysis

- 2.4.1 The Winter Service is contained within the Quality System as one process which contains three main procedures for Winter Preparation, Winter Action and Operations.

#### 2.4.2 Winter Preparation Process

- Preparation of different categories of treatment routes
- Training of personnel
- Calibration of plant
- Placing and maintaining of grit bins
- Ordering an adequate supply of salt for the start of the overall Winter period.
- Allowing for additional resources should they be required for extreme conditions.
- Liaison with external and internal partners.
- Winter Action & Operations Process

#### 2.4.3 The decision-making process for the Winter Controller.

- Issuing of Instructions.
- Distribution of Instructions.

|          |                             |          |            |

- Procedures for gritting and ploughing.
- Response Times.
- Monitoring and reporting of actions completed.
- Maintaining an adequate supply of salt.

## 2.5 Arrangements for Performance Monitoring and Updating

### 2.5.1 Performance Monitoring

### 2.5.2 Ayrshire Roads Alliance evaluates and compares the following 5 local key performance measures for each winter period: -

- Percentage of vehicles ready for winter by 19th October '20
- Percentage of pre-salted routes completed within 3 hours target time
- Route efficiency
- Actual winter expenditure per kilometre of Carriageway/per kilometre of gritted route.
- Tonnage of salt used

### 2.5.3 These performance measures are reported on a regular basis to the Ayrshire Shared Service Joint Committee.

### 2.5.4 In addition, Ayrshire Roads Alliance will submit an annual return to the Association for Public Service Excellence (APSE) on behalf of East and South Ayrshire Councils to compare Ayrshire Roads Alliance performance against other participating Councils.

### 2.5.5 The Winter Service Plan is reviewed annually and amended and updated before the 1st of October to include any revisions and changes to the service delivery.

### 2.5.6 The Quality System has been updated to the standard specified in ISO9001:2015 which includes the concept of monitoring and continuous improvement in line with the concepts of best value.

## 3.0 Route Planning for Carriageway and Footway

### 3.1 General

### 3.1.1 The pre and post salting routes of East and South Ayrshire are reviewed on an annual basis taking into account any alterations to the roads which are treated under the specified gritting criteria.

### 3.1.2 The main treatment options are as follows:

- Precautionary pre salting
- Post salting
- Snow routes

### 3.1.3 Routes have been devised to ensure efficient coverage within reasonable timescales.

### 3.1.4 Sets of Route Cards listing all precautionary salting routes are held electronically by the Head of Service, Ayrshire Roads Alliance.

### 3.1.5 Route descriptions for Priority 1 gritting route are available within Appendix 4 and Appendix 5 of this document.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 10 of 122              | Date     | 01/10/2020 |

### 3.2 Carriageways Routes for precautionary treatment

3.2.1 The following roads will be treated if it is forecast that ice or snow is likely to be present on road surfaces:

- *Priority 1* – Strategic Routes and Main Distributor Routes, i.e. all 'A' class roads i.e. A70, A71, A77, A713, A735, A736, A759, A719, A714, A79 (This does not include for A77, A78, A76, M77 and a part of the A77 which are responsibility of the Transport Scotland). Safe and reliable access to emergency facilities including fire and rescue, police, ambulance services and hospitals. Other public services (Schools, health centres etc.) access to towns and villages, routes with high percentage of school traffic, designated public transport routes, access to main industrial and business centres.

3.2.2 The duty Winter Controller has authority to amend agreed treatments should updated forecasts or conditions make this necessary. Where changes in the expected weather are forecast the duty Winter Controller will contact the Winter Supervisors and instruct them to take the necessary action. All such changes will be recorded in the electronic Vaisala Manager System.

3.2.3 A review of gritting treatment hours was carried out. This incorporated treatments which take place between the hours of 2200hrs and 0500hrs Mon-Sun. In extreme conditions and where the forecast merits action, treatments can be actioned during these times. We will continue to have 24/7 standby cover. There is little benefit and high cost associated with treating roads when traffic is minimal, to be fully effective, de-icing requires the actions of vehicles to aid dispersal and to break up snow and ice.

### 3.3 Carriageway Routes for post treatment

3.3.1 Given the presence of ice or snow on roads and a forecast that these conditions will last for a period longer than it would take to treat the roads, appropriate treatment may take place to cover the following:

- Priority 2 routes to be treated as resources permit when sub-zero temperatures are forecast to continue to last beyond midday, following completion of Priority 1 routes.  
*Priority 2* – Secondary distributor roads, including B class roads not included on Priority 1 routes, local distributor roads in residential areas.
- Priority 3 Routes will be treated as resources permit when sub-zero conditions are forecast to continue over an extended period.  
*Priority 3* – Local access roads in residential and industrial areas, minor rural through roads and C class roads not included on priority 1 or priority 2 routes. Other roads with restricted access, cul-de-sac etc. not treated during post salting actions will be treated as resources permit utilizing available and suitable special plant.
- Reported trouble spots not treated during precautionary treatment, or requests for assistance from emergency services or social services, as resources permit.

### 3.4 Carriageway Routes for snow clearance

3.4.1 At any time the priority is as follows:

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 11 of 122              | Date     | 01/10/2020 |

- While snow is still falling, only the Minimum Winter Network Routes (Priority 1/Snow Routes) will be ploughed and treated in order to target resources and to keep these routes open for traffic. After snow has stopped falling but is lying, the remaining Priority 1 precautionary routes will be ploughed and treated before commencing Ploughing and treatment on Priority 2 and Priority 3 routes as resources and conditions permit.
- Additional resources to be called out to plough and treat Priority 2 and Priority routes after snow has stopped or when conditions warrant.

## 3.5 Footway Routes for Precautionary Treatment

3.5.1 The following footways will be considered by the Head of Service – Ayrshire Roads Alliance for treatment if it is forecast that ice or snow is likely to be present on road surfaces or where surfaces are wet, with temperatures forecast to remain below zero until 10.00 the next working day.

- Priority 1 - Urban shopping areas and precincts. And other areas or pedestrian concentration, and where applicable within the Priority 1 footway route safe and reliable footway access to emergency facilities including fire and rescue, police, ambulance services and hospitals, and other public services (Schools, health centres etc.).
- Priority 1 footways will only be treated as resources permit.

## 3.6 Footway Routes for Post Treatment

3.6.1 The following footways will be treated if it is forecast that ice or snow is likely to be present on road surfaces, with temperatures forecast to remain below zero over a prolonged period:

- *Priority 2* – Main access routes to town and village centres, special needs of disabled people or older people where critical footway access is required. (Residential homes etc.). Known problem areas including significant gradients. Exposed areas and other topological areas.
- It is not possible with the resources to treat all of the footways. Ayrshire Roads Alliance encourages self-help through the placing of Community grit bins and other grit bins throughout the roads network and when requested, resources to community groups.

## 3.7 Routes for cycle route treatment

3.7.1 Road cycle routes will be treated along with the adjacent carriageway when resources permit. No treatment will be carried out on off-road cycle routes.

## 3.8 Response and Treatment Times for Carriageway Treatments

3.8.1 When ice is predicted to be present during the morning peak traffic flow (prediction from the previous evening's forecast) precautionary salting of routes should be completed in 3 hours from the start of treatment and before 08:00 hours.

3.8.2 For Emergency Salting and Ploughing the time between the decision to start treatment and the start of treatment will be no more than one hour except where pre-planned gritting is scheduled.

## 3.9 Response and Treatment Times for Footway and Cycle Route Treatments

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 12 of 122              | Date     | 01/10/2020 |

- 3.9.1 Priority 1 footway routes should be completed in 5 hours from start of treatment and before 10:00 hours.
- 3.9.2 Priority 2 footway routes will be instructed for treatment as and when resources permit.
- 3.9.3 On-road Cycle Routes will be treated with the adjacent carriageway as resources permit.
- 3.9.4 Where resources permit ad hoc visual footway route inspections will be undertaken and footway treatments will commence on instruction.

### **3.10 Allocation of plant, vehicles, equipment, and materials to routes**

- 3.10.1 The road network is serviced by three Roads Depots located at Galston, Coylton, and Girvan.
- 3.10.2 The necessary resources are stored and located within these depots to treat the designated networks carriageway routes.
- 3.10.3 The treatment of the networks footway routes shall be undertaken by Ayrshire Roads Alliance Internal Roads Maintenance Units, East Ayrshire Councils Outdoor Services and by private Contractors.

### **3.11 Location and maintenance of grit bins**

- 3.11.1 Approximately 729 grit bins are sited locally within the network, for self- help by the public, these bins are topped up on a monthly basis as required, and as resources permit. The number of grit bins and their locations are continually under review and the current Grit bins locations are available as noted on Ayrshire Roads Alliance web page.
- 3.11.2 Grit bins will only be placed at locations where the criteria within the grit bin policy (Appendix 2) are met within the network, Community grit bins are available to encourage self- help and are located within town and village Centre's. These bins will be topped up on a monthly basis as required and as resources permit. The number of Community grit bins and their locations are presently under review and the current Community Grit bins locations are available on Ayrshire Roads Alliance web page.

### **3.12 Community self-assistance**

- 3.12.1 To provide assistance and improve footway treatment resilience, over the last 6 years Ayrshire Roads Alliance have engaged with local Community Groups and others. We currently have 57 groups assisting with self-help footway gritting where we provide training, salt materials, footway spreading equipment and appropriate PPE for Groups to undertake treatments within their local Areas. Requests for these resources should be made in writing to the Head of Service.

## **4.0 Weather Prediction and Information**

### **4.1 Forecasting, Patrols, and other Decision Support Information**

- 4.1.1 The support information for use in 'Decision Making' will usually be a combination of the Road Weather Forecast, Road and Weather Monitoring Data and Patrolling of the network.
- 4.1.2 Ayrshire Roads Alliance have contracted a Weather Service Provider to supply forecasts for the network each day over the period 1st October to 15th May.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 13 of 122              | Date     | 01/10/2020 |

- 4.1.3 The road weather forecasts are provided via a computer link to Ayrshire Roads Alliance during the normal working day or a portable computer to the Winter Controller out with normal hours.
- 4.1.4 Should any problems exist with the computer systems for obtaining the weather forecast alternative arrangements are in place
- 4.1.5 Four Ice Detection Outstations are installed near Corwar, Dalmellington, Dunlop and Fenwick. In addition the Alliance has access to a further 7 Outstations on the Trunk Road Network and access to information from the stations is available to the Winter Controllers.
- 4.1.6 The data available from the outstations, which can be presented in both graphic and tabular format include:
- a) Road surface temperature
  - b) Deep road temperature
  - c) Air temperature
  - d) Wind speed and direction
  - e) Relative humidity
  - f) Precipitation.
  - g) Surface state (including level of salt present on road surface)
- 4.1.7 The Weather Service Provider has direct access to the information from these outstations, which Improves the accuracy of their forecasts.
- 4.2 Information to be provided by Forecaster**
- 4.2.1 Specification of Forecasts Three forecasts are provided to Ayrshire Roads Alliance daily at 05.00, 11.00 and 17.00 (including weekends). Each forecast details the expected weather and road conditions for the forthcoming 36 hour period and contains the following information
- a) Details and confidence of hazards from Ice, Hoar Frost, Snow, Fog, Strong Wind and Rain,
  - b) Wind speed and direction, road state, and snow depth accumulations.
  - c) A 2-10 day forecast of expected hazards of Ice, Hoar Frost, Snow, Fog, Strong Wind and Rain with comments on the outlook.
- 4.2.2 The Weather Service Provider carries out 24 hour monitoring of conditions and if these vary significantly they will contact the Winter Controller directly to advice of the change and when appropriate will issue an updated forecast.
- 4.2.3 The Weather Service Provider provides a 24 hour consultancy service for the Winter Controller for advice and clarification of forecasts.
- 4.3 Timing and distribution of information**
- 4.3.1 The Winter Controller will receive the weather forecast each day at 0500hrs, 1100hrs and 1700hrs and will assess and consult on the forecast and any other relevant data and decide what action to take, if any. An instruction will then be issued to the relevant staff and external bodies detailing the action proposed.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 14 of 122              | Date     | 01/10/2020 |

- 4.3.2 Each morning at 0500hrs the Winter Controller will assess the forecast and make a decision for the coming 12-24hr period. This will allow the Depot Supervisors to plan their works for the coming day starting at 0800hrs. At 1700hrs the Winter Controller will assess the latest forecast and make adjustments (if considered necessary) to the next 12-24hr period. All decisions are recorded with the electronic Vaisala Manager System and are available to relevant staff at all times.
- 4.3.3 If the weather changes out-with these times the Weather Service Provider will contact the Winter Controller directly with a revised forecast.
- 4.3.4 Any amendment made to previous instructions after an update from the Weather Forecast Provider, either by phone or during the evening update will be passed to the Winter Supervisors immediately and the appropriate records updated.
- 4.4 Maintenance of ice detection equipment**
  - 4.4.1 Maintenance and service arrangements are in place for outstations and the appropriate repairs.

## 5.0 Organisational Arrangements and Personnel

- 5.1 Organisation chart and employee responsibilities**
  - 5.1.1 The organisation of staff for Winter Service is shown on Appendix 1.
  - 5.1.2 Employee Responsibilities
  - 5.1.3 The Winter Controller is responsible for monitoring the road and weather conditions, for reaching an appropriate decision on treatment of the network and informing Winter Supervisors and others responsible for overseeing the works and recording the decision.
  - 5.1.4 The Winter Supervisor is responsible for utilising and managing effectively all resources under his control i.e. labour, plant and materials to effect swift treatment of the road network. He/she will also complete all relevant paperwork timeously and update and record any alterations to decisions made.
  - 5.1.5 The Depot Management Teams will ensure adequate resources are available for the supervisor to undertake his duties efficiently with regard to performance indicators.
  - 5.1.6 The Winter Service Operatives are responsible for undertaking gritting duties in a safe and efficient manner. He/she shall complete all relevant paperwork for submission to the Winter Supervisor.
  - 5.1.7 All personnel involved in the Winter Service will acquaint themselves of the duties, responsibilities and working procedures necessary for them to carry out their tasks in an effective and efficient manner.
  - 5.1.8 The contact details and numbers are listed below.
    - a) During Normal Working Hours: Risk Management Centre 03457 240000  
Ayrshire Roads Alliance 01563 503160  
South Ayrshire Monitoring Station 0300 123 0900
    - b) Out with normal working hours Risk Management Centre 03457 24 0000  
South Ayrshire Monitoring Station 0300 123 0900
- 5.2 Employee duty schedules, rotas, and standby arrangements**

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 15 of 122              | Date     | 01/10/2020 |

- 5.2.1 Special arrangements will be made to ensure the availability of trained and competent operatives and supervisory staff for the Overall Winter Period
- 5.2.2 A weekly rota system is in operation for the Winter Controllers, Winter Supervisors and Winter Service Operatives.

### 5.3 Additional Resources

- 5.3.1 During severe weather conditions the Head of Service - Ayrshire Roads Alliance may augment resources from other East Ayrshire Council Departments and/or private contractors using the externally procured Winter Maintenance Assistance Contract.
- 5.3.2 Labour rates will be agreed with these departments and interested private contractors prior to the onset of the winter period.
- 5.3.3 All contractors will supply a list of contact numbers to provide when available resources, on a 24 hours a day and 7 days a week basis.
- 5.3.4 Contractors will attend a Winter Service Presentation in all aspects of Health and Safety in respect to the winter service operations before being accepted as suitable service providers.

### 5.4 Training

- 5.4.1 Winter Controllers and Winter Supervisors will undertake Forecast and Treatment training as provided by the Weather Service Provider.
- 5.4.2 Winter Supervisors and Winter Service Operatives will receive training on all aspects of their duties including a familiarization exercise with all plant and procedures before the onset of the Overall Winter Period.
- 5.4.3 All Winter Service Operatives will either have an SVQ certificate in Winter Maintenance or be working towards achieving one.

### 5.5 Health and Safety Procedures

- 5.5.1 The Head of Service - Ayrshire Roads Alliance is responsible for the Health, Safety and Welfare for staff.
- 5.5.2 During winter service operations, drivers/ operatives must adhere to the following health and safety documentation:
- East Ayrshire Council Health and Safety Policy
  - Departmental Health and Safety Policy Statement
  - Health, Safety and Welfare at Work Employee Handbook
  - Activity/Risk Assessments for Individual Activities
  - Compliance with EAC Health, Safety and Welfare standards.

## 6.0 Plant, Vehicles and Equipment

### 6.1 Plant, Vehicles and Equipment

- 6.1.1 The availability of vehicles and ancillary equipment is detailed in the Severe Weather Operations Plan.

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 16 of 122              | Date     | 01/10/2020 |

6.1.2 The current fleet replacement program will ensure that Winter Service obligations can be met. Programmed repairs and servicing to the fleet will be carried out during the summer months. The remainder of the fleet will be inspected and serviced as per the Fleet Management Inspection and Servicing Schedule.

6.1.3 Global Positioning System (GPS) tracking equipment is installed in vehicles to provide accurate control of gritting and to establish accurate treatment records.

## **6.2 Location of Plant, Vehicles and Other Equipment**

6.2.1 Ayrshire Roads Alliance vehicles will operate from the three Road Depots located at Galston, Coylton, and Girvan.

## **6.3 Garaging, servicing and maintenance arrangements**

6.3.1 Mechanics will be available on an out-of-hours rota to maintain and repair the dedicated salting vehicles and equipment.

## **6.4 Contact and hire arrangements for Contract plant**

6.4.1 Contract and hire companies on the East Ayrshire framework contracts will be solely hired. Only in extreme weather and emergencies conditions will other private contract and hire companies be considered.

6.4.2 During severe weather conditions the Head of Service - Ayrshire Roads Alliance may increase resources from other East Ayrshire Council Departments and private contractors.

## **6.5 Calibration Procedures**

6.5.1 Pre-winter checks and calibration on all vehicles, plant and equipment, used by Ayrshire Roads Alliance for Winter Service provision will be carried out by the 1st October and confirmation of their readiness to the Head of Service - Ayrshire Roads Alliance will be made by the Operations Manager. An additional calibration for winter vehicles will be undertaken during mid-season and before 31st January. Transport Services will ensure that the controls of all spreading equipment are calibrated and clearly marked for specified rates of spread up to a maximum of 40g/m<sup>2</sup>.

6.5.2 Salt is the principal de-icing agent used in the Roads Network and should be supplied in compliance with BS3247 (2011).

6.5.3 The original copies of road salt test certificates, weighbridge certificates and vehicle and equipment calibration shall be kept as part of the Ayrshire Roads Alliance Quality System to allow both internal and external auditing.

## **6.6 Fuel stocks and locations**

6.6.1 Fuel stocks for the dedicated salt spreading and other vehicles being used for winter maintenance operations are provided at Galston Depot, Coylton Depot, Girvan Depot and Transport Depot, Crookedholm. The vehicles will remain topped up ready for immediate use. Standard East Ayrshire Council fuelling arrangements apply. Fuel stocks are remotely monitored by Transport Services on a regular basis and orders placed to ensure fuel resilience during extreme weather conditions.

# **7.0 Salt and De-Icing Materials**

## **7.1 Location and capacity of stocks for salt and other materials**

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 17 of 122              | Date     | 01/10/2020 |

- 7.1.1 Salt will be held in salt barns at Galston Depot, and Coylton Depot and externally stored at Girvan Depot.
- 7.1.2 The combined quantity of salt held in stock at the start of October will be a minimum of 12,000 tonnes. The minimum stock level will be 4,400 tonnes, rising to 8,1500 tonnes in December and January (to cover the holiday period) based on level of resilience as recommended in the United Kingdom Roads Liaison Group (UKRLG) review of February 2009.
- 7.1.3 Calibrated weighbridge systems for stock control and salt usage purposes, are available at the three Roads Depots.
- 7.1.4 The depots will supply regular reports on salt usage to the Operations Manager who will monitor usage and place supplementary orders for salt as required.
- 7.2 Testing Arrangements**
  - 7.2.1 Salt for use during winter will meet the requirements of BS 3247 'Salt for Spreading – Coarse Rock Salt'. On request of the Head of Service – Ayrshire Roads Alliance, salt materials will be tested when delivered to confirm compliance with the specification. An additional mid- season testing of depot salt materials will be undertaken.
- 7.3 Loading Arrangements**
  - 7.3.1 Depot Managers are responsible for ensuring a loading shovel is available for loading the salting vehicles. A 'backup unit', in case of breakdown of the primary loading shovel should be available at the depot at all times during the Overall Winter Period.
- 7.4 Pattern of Spreading**
  - 7.4.1 The gritters are to be set to salt a width of carriageway which will be both lanes of single carriageways or both lanes of one side of a dual carriageway.
  - 7.4.2 The gritter will generally travel in the left-hand lane and the spreading pattern will be set to cover both lanes unless multiple passes are required on a wide one-way road.
- 7.5 Salt Spread Rates**
  - 7.5.1 The variable nature of winter conditions makes it difficult to define exact treatments and salt applications. Guidance on appropriate spread rates is given in the winter treatment matrix in the Severe Weather Operations Plan.
  - 7.5.2 Sustained low temperatures occur only rarely. In this event however, account will be taken of the need to increase the rate of spread of salt. Below -11°C the action of salt is ineffective and other measures will be required e.g. introducing salt/grit mixtures.
- 7.6 Salt Purchasing Arrangements and Supplies**
  - 7.6.1 Ayrshire Roads Alliance is a member of the Scotland Excel consortium of local authorities for the purchase of winter salt. The tender includes for the main delivery of salt to the three Roads Depot Facilities before the start of winter and also includes for further deliveries of salt, upon request, to replenish the stockpiles as necessary.
  - 7.6.2 Other Council Departments
  - 7.6.3 Other Council Services and Stakeholders must make their own provision for treatment of areas out with the limits of the public road network, which are not the responsibility of the Ayrshire Roads Alliance.
  - 7.6.4 Supply of salt to others

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 18 of 122              | Date     | 01/10/2020 |

- 7.6.5 No salt purchased by Ayrshire Roads Alliance will be available for purchase by external parties.

## 8.0 Operational Communications

### 8.1 Technical systems information

- 8.1.1 Good communications are essential to ensure speedy and effective response to winter conditions.
- 8.1.2 The Winter Controllers and Winter Supervisors will be issued with mobile phones with access to the internet and internal email systems.
- 8.1.3 Treatment plans and timings, ongoing actions, alterations to plans and salt usage will be recorded within electronic Vaisala Manager system. This web- based system will be accessible by all Winter Controllers and Supervisors. All information is archived by the software supplier and is held remote from the Council network.
- 8.1.4 During salting and snow clearance operations each Winter Operative has access to a mobile phone to maintain contact with Winter Supervisors and the operations depot.
- 8.1.5 All Vehicles are fitted with a Tracker and GPS system which allows the sections of road which have been treated to be clearly identified along with a time of treatment.

### 8.2 Reporting arrangements and protocols

- 8.2.1 The Winter Controller will report the 'Daily Decision' to the appropriate roads personnel and stakeholders as soon as possible after it has been reached.
- 8.2.2 The standard method of distributing the information will be via electronic Vaisala Manager system.
- 8.2.3 On request, the Winter Supervisor will prepare a daily report on the previous 24 hour road conditions and treatments, any ongoing treatments and salt usage for the Head of Service - Ayrshire Roads Alliance. The report will be required by 0845 hours daily Monday – Friday.
- 8.2.4 The Winter Supervisors will record details of salt usage via the electronic Vaisala Manager system and supply separate information regarding vehicle, equipment and plant breakdowns and repair actions taken.
- 8.2.5 The Winter Supervisors will report details such as all additional plant and labour etc., hired from other Departments or Contractors, as soon as practical, to the Winter Controller.
- 8.2.6 During prolonged spells of severe conditions a decision will be made whether to set up a manned 24 hour control centre. This operational centre will be based at Gauchalland Depot. When required a Strategic Centre will be based at the Risk Management Centre who can as required liaise with South Ayrshire Monitoring Station. Throughout the treatment period, Winter Supervisors will continue to report and update to the Winter Controller on operational progress and actions taken during snow clearing operations and dealing with prolonged spells of ice.

## 9.0 Information and Publicity

### 9.1 Local Press and broadcast information

|          |                             |          |            |
|----------|-----------------------------|----------|------------|
| Document | Winter Service Plan 2020/21 | Revision | 0          |
| WINT-1   | Page 19 of 122              | Date     | 01/10/2020 |

- 9.1.1 It is important that the general public is aware of and understands Ayrshire Roads Alliance approach to the Winter Service. Publicity is to be given before the beginning of the Core Winter Period describing the level of service provision and contact points.
- 9.1.2 During the Overall Winter Period and particularly during prolonged spells of snow and ice information will be made available to the public by the Communications Team via
  - a) Press releases
  - b) Local Radio Stations
  - c) East and South Ayrshire Intranet / Web Site
  - d) Motoring organizations
  - e) The Head of Service - Ayrshire Roads Alliance is authorised to respond to the Press, Radio and Television on matters relating to local road conditions.

## 9.2 Publicity

- 9.2.1 General advice and information for the public concerning the Winter Service will be catered for by publishing a Winter Advisory leaflet which will be available to the public via Ayrshire Roads Alliance and at selected locations throughout the Roads Network, such as libraries etc.

## 9.3 Other Key Local Contact Information

- 9.3.1 For information only The Head of Service - Ayrshire Roads Alliance will inform the Police Force Control and Ayrshire Civil Contingency team when snowfalls in excess of 30mm are predicted.
- 9.3.2 Reports from the Police or Risk Management Centre or South Ayrshire Monitoring Station of dangerous road conditions will be acted on as soon as practicable, when resources are available.
- 9.3.3 The Head of Service - Ayrshire Roads Alliance will consult the Police and advice the Risk Management Centre and South Ayrshire Monitoring Station when any road is closed due to winter weather conditions.
- 9.3.4 The Risk Management Centre and South Ayrshire Monitoring Station are responsible for dealing with the general public's telephone inquiries regarding the Winter Service. The Risk Management Centre has access to electronic Vaisala Manager system and other key information regarding winter service operations to enable an efficient response to public enquiries.
- 9.3.5 Risk Management Centre is in operation 24 hours a day, 7 days a week, and can be contacted on 0345 724 0000. South Ayrshire Monitoring Station is in operation 24 hours a day, 7 days a week, and can be contacted on 0300 123 0900

## 9.4 Records

- 9.4.1 Records will be retained by Ayrshire Roads Alliance for 3 years and retained in archives for a further 7 years.

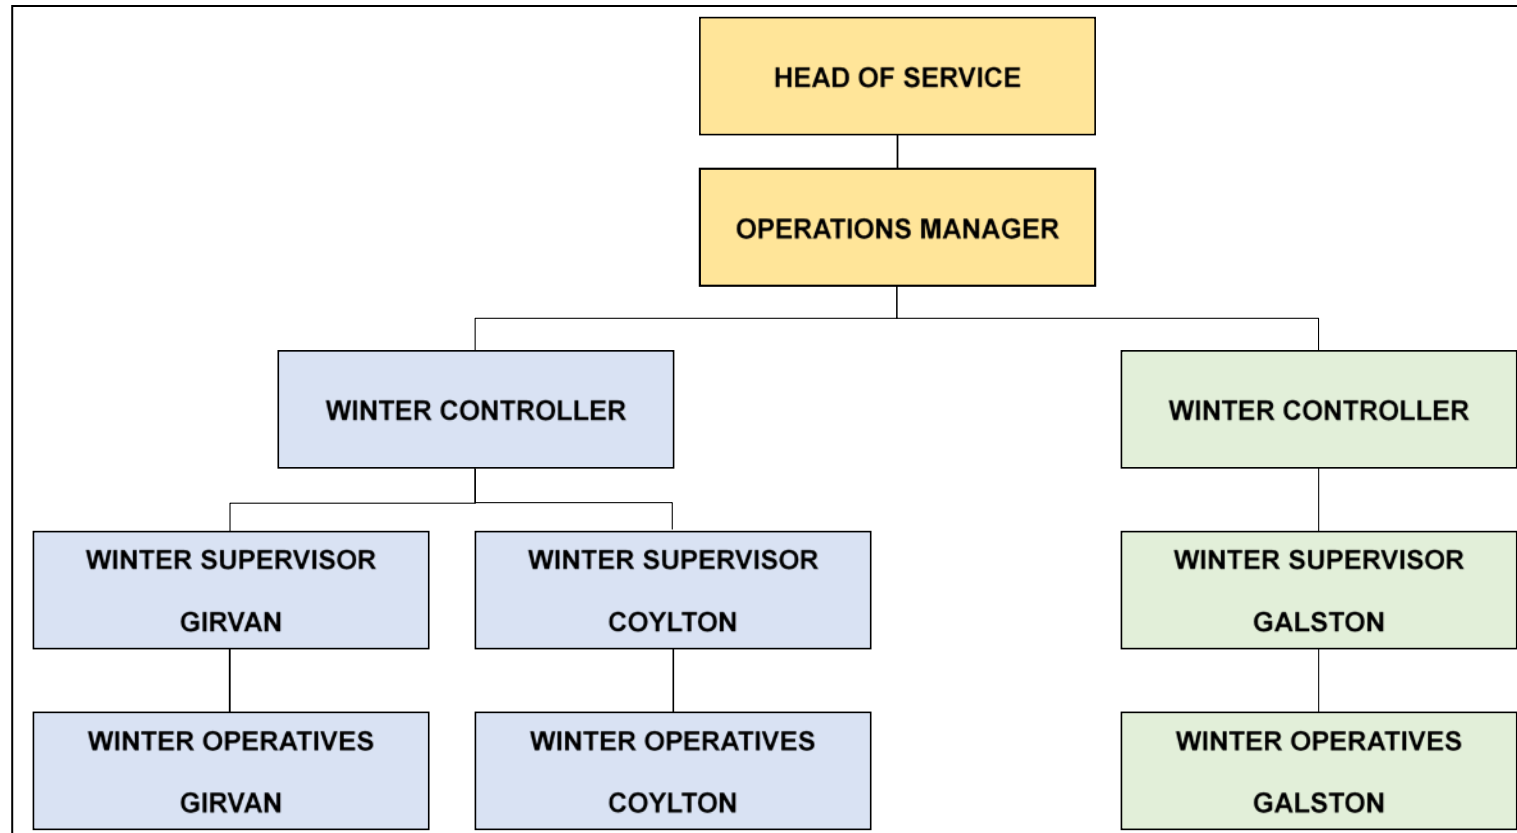

## 9.5 Responsibilities and Guidance for Providing Information

- 9.5.1 The Head of Service - Ayrshire Roads Alliance is responsible for guidance of the information to be supplied.

## Appendix 2 Grit Bin Policy & Requests

- 1) Ayrshire Roads Alliance shall provide grit bins for self-help by members of the public. These shall be sited locally in accordance with this policy.
- 2) The location of Community grit bins and other grit bins will be recorded in an electronic database and are available on the Ayrshire Roads Alliance website.
- 3) Grit bins shall only be located where the following criteria are met:
  - a) The location is not on a precautionary carriageway route;
  - b) The gradient is greater than 1 in 15, or at a junction with a known history of accidents;
  - c) The location shall not obstruct the passage of pedestrians, a minimum of 1.5m clearance on the footway is required;
  - d) The location shall not obstruct sight lines;
  - e) The location is not within 200m of another grit bin location.
  - f) The location is within an urban area.
  - g) The location is within the boundary of the public road. The Ayrshire Roads Alliance will not provide grit bins in private areas or car parks for internal use by either the Council or any other public or private property such as schools, parks, hospitals, old people's home etc. unless a service level agreement is in place.
- 4) Grit bins will only be located where they can be filled from a lorry. The grit bins shall be replenished at the start of the Winter Period and on a monthly cycle during the Winter Period, as resources permit.
- 5) Grit bins will generally be left in place during the summer months, unless there is a history of vandalism at a particular location.
- 6) Requests for salt bins must be in writing using the application form which is also available to download from the Ayrshire Roads Alliance website.

*A request will not be accepted unless a location to site the grit bin has been agreed. Therefore, even if the criterion for locating a grit bin is met, none will be provided if the adjacent residents cannot agree a position.*

## Appendix 3 Request to Site a Grit Bin

### 1 Proposed Location

## Appendix 4 Priority 1 Carriageway Gritting Routes – East Ayrshire Council

Gauchalland Depot in Galston operates eight Priority 1 Carriageway gritting routes, mainly but not exclusively, confined to the north of the Council area; and includes the major towns of Kilmarnock and Cumnock.

Meadowhead Depot in Coylton operates two of the eight Priority 1 Carriageway gritting routes for the East Ayrshire area, mainly in the south of the Council area; and includes the major towns of Dalmellington and New Cumnock.

### Method

Acting on advice received from the Council's weather service provider, Priority 1 Carriageway routes will receive precautionary treatment prior to the onset of frost / ice.

Included within the Priority 1 Carriageway routes are all A class and B class roads and strategic C class and unclassified roads.

Roads which meet the Council's criteria of precautionary treatment applied to a minimum of one road servicing council schools and emergency service depots, plus roads servicing high concentrations of employment, commercial outlets and densely populated residential areas and other roads of strategic importance are also included.

The exception to this arrangement is when the Council's weather service provider advises that there is no risk of hazardous winter road conditions in any of the two climatic domains. In this event altered routes which exclude roads in a particular climatic domain are used.

A small number of roads within residential areas may be partly treated in order to optimise a predetermined routing system.

## Appendix 8 Priority 1 Carriageway Gritting Routes - South Ayrshire Council

Meadowhead Depot in Coylton operates seven Priority 1 carriageway gritting routes, mainly but not exclusively, confined to the north of the Council area; and includes the major towns of Ayr, Prestwick and Troon.

Grangestone Depot in Girvan operates three Priority 1 carriageway gritting routes, mainly in the south of the Council area; and includes the major towns of Maybole and Girvan.

### Method

Acting on advice received from the Council's weather service provider, Priority 1 routes will receive precautionary treatment prior to the onset of frost / ice.

Included within the Priority 1 routes are all A class and B class roads and strategic C class and unclassified roads.

Roads which meet the Council's criteria of precautionary treatment applied to a minimum of one road servicing council schools, and emergency service depots, plus roads servicing high concentrations of employment, commercial outlets and densely populated residential areas and other roads of strategic importance are also included.

The exception to this arrangement is when the Council's weather service provider advises that there is no risk of hazardous winter road conditions in any of the four climatic domains. In this event altered routes which exclude roads in a particular climatic domain are used.

A small number of roads within residential areas may be partly treated in order to optimise a predetermined routing system.

**6**

**Grit, U35 to U55 (Netherton Road), right into U55 to B742, Stop Gritting.** **3.43kms**

**7**

**Travel, turn at a safe and convenient location** and return along **U55**, at junction with **U35**, **Start Gritting.**  
**2.57kms**

**8**

**Grit, U55 to U32** (Fardenwilliam Road), left into **U32**, continue gritting to boundary with East Ayrshire, **Stop Gritting.** **2.84kms**

**9**

**Travel, turn at a safe and convenient location** and return along **U32** to junction with **U55**, **Start Gritting.**  
**0.17kms**

**10**

**Grit, the U32 to the C110, Stop Gritting.** **2.57kms**

**11**

**Travel**, left into the **C110**, left into the **U61** (Roaston Road), **Start Gritting.** **2.40kms**

**12**

**Grit, the U61 to C11, Stop Gritting.** **0.69kms**

**13**

**Travel**, right into the **C11**, right into the **C110** and travel to the **U23** (Crawfordston Road), **Start Gritting.**  
**3.17kms**

**14**

**Grit**, left into the **U23** and continue gritting to the **B7045**, **Stop Gritting.** **3.43kms**

**15**

**Travel**, left into the **B7045**, right into the **C46**, left into the **A77**, right into the **B7023**, left into the **A719** to the **U111** (Culzean Castle Road), **Start Gritting.** **9.18kms**

**16**

**Grit**, right into **U111** and continue to end of main gate, **Stop Gritting.** **0.39kms**

**17**

**Travel**, return along *U111*, left into *A719*, left into *U5* (Balchrison Road), **Start Gritting.**

**2.28kms**

**18**

**Grit, *U5* to end, Stop Gritting.**

**2.34kms**

**19**

**Travel**, return along *U5*, left into *A719*, left into *U24* (Croy Road), **Start Gritting. 5.61kms**

**20**

**Grit, *U24* to end, Stop Gritting.**

**1.19kms**

**21**

**Travel**, return along *U24*, left into *A719*, right into the *U63* (Sauchrie Road), **Start Gritting.**  
**8.89kms**

**22**

**Grit, *U63* to the *B7024*, Stop Gritting.**

**6.17kms**

**23**

**Travel**, right into *B7024*, left into *U47* (Laigh Grange Road), **Start Gritting. 0.06kms**

**24**

**Grit, *U47* to the *A77*, Stop Gritting.**

**1.51kms**

**25**

**Travel**, left into *A77* to the *U14* (Brae Road), **Start Gritting.**

**2.76kms**

**26**

**Grit, *U14* to the *B7024*, Stop Gritting.**

**1.23kms**

**27**

**Travel, turn at a safe and convenient location** and return along the *U14*, left into the *A77*, right into the *C39*, right into the *C74*, left into the *B742*, right into the *U100* (Martnaham Road), **Start Gritting.**
